

KillTest

Exam : IBM 190-847

Title : IBM Lotus Notes Domino 8 System
Administration Fundamentals

Ver : version2.00 05-25-2008

English: <http://www.killtest.com>

Big5 : <http://www.killtest.net>

GB : <http://www.killtest.cn>

The safer,easier way to pass any IT exam.

1.The user name that creates the original DB2 database must be a member of which of the following groups?

- A.SYSADM
- B.MANAGERS
- C.DB2ADMIN
- D.ADMINISTRATORS

Correct:A

2.The DB2 Access server facilitates your use of the Lotus Domino Designer view functions for DB2. Which of the following is enabled by installing the DB2 Access server?

- A.Replication
- B.DB2 group locking
- C.ACLs and reader lists
- D.DB2 container storage

Correct:C

3.It was decided to locate the DB2 server on the same physical box as the Lotus Domino server. In this scenario, the DB2 database that stores Domino data is titled which of the following?

- A.Lotus
- B.Domino
- C.NSFDB2
- D.DB2Domino

Correct:B

4.When DB2 is the default database storage type, the databases are stored in what location?

- A.In nsf files in the DB2 database
- B.As nsf files on a remote db2 server
- C.As files in the Domino server's disk space
- D.In a DB2 database managed by the DB2 server

Correct:D

5.John registered a new server. In which one of the following was the Server document placed?

- A.NAMES.NSF
- B.CERTLOG.NSF
- C.CATALOG.NSF
- D.DIRECTORY.NSF

Correct:A

6.What is the maximum number of organizational units that may be listed in a hierarchial name?

- A.Two
- B.Three
- C.Four
- D.Five

Correct:C

7.The site update database in Domino supports which of the following security controls for distributing updates?

- A.Schema
- B.Encryption
- C.Author fields
- D.Reader Fields

Correct:D

8.Which type of server installation provides standard Domino application services and custom Domino databases for Notes and Web clients, as well as support for clusters?

- A.Domino Utility Server
- B.Domino Database Server
- C.Domino Messaging Server
- D.Domino Enterprise Server

Correct:A

9.When the LDAP service can't find information for which an LDAP client is searching, it can return a referral to the client. What Domino service does it utilize to provide this referral?

- A.MAPS
- B.Referrer
- C.Replicator
- D.Directory Assistance

Correct:D

10.While configuring an Internet Site document, Kira has left the option blank for which Domino server hosts the site. What is the default action the server will perform with this option not configured?

- A.The Internet Site will not be loaded on any Domino server
- B.The Internet Site will be loaded on all Domino servers in the domain
- C.The Internet Site will only accept connections for the first IP Address on the server
- D.The Internet Site will only accept connections for the hostname in the server document

Correct:A

11.What two canonical name components are required when registering new users?

- A.Common name and country
- B.Organization and country
- C.Common name and organization
- D.Organizational unit and organization

Correct:C

12.Users have been selecting the option for 'More Secure' logout when leaving Domino Web Access. What function does this option provide?

- A.This option forces the logout to occur via SSL over HTTP on the mail server
- B.This option scrambles the user's Internet password in the person document for the next login
- C.This option deletes all traces of Domino Web Access and all other Web pages in the temporary Internet files folder
- D.This option deletes all traces of the user's personal use of Domino Web Access and any Web pages that they may have browsed, but keeps Domino Web Access program elements

Correct:C

13.When changing the order in which ports are listed in the server Setup Ports dialog box,

where does this also change the Ports listing?

- A. In the server document
- B. In the server notes.ini
- C. In the server ports document
- D. In the server configuration document

Correct:B

14.Each time Melissa creates a certifier ID, Domino creates a certifier ID file and which of the following?

- A. Password database
- B. Certifier document
- C. Password hash file
- D. Certifier database

Correct:B

15.Server Fast Restart allows a new Domino instance to start while NSD diagnostics are being run on the initial Domino server instance. Which of the following processes handle the initiation of a new Domino instance?

- A. NSD
- B. faultmon
- C. serverrecovery
- D. diagnosticcollector

Correct:B

16.Why did Tom designate Server1/Boise/Acme as the Administration Server for the Domino Directory?

- A. To make sure that all new users were registered on Server1/Boise/Acme.
- B. To prevent users from making changes to the Domino Directory on Server1/Boise/Acme.
- C. To force administrators to make all changes to the Domino Directory on Server1/Boise/Acme.
- D. To ensure that the Administration Process would process all Domino Directory changes on Server1/Boise/Acme.

Correct:D

17.Which one of the following group types is used to prevent access to Domino servers?

- A. Mail only
- B. Servers only
- C. Deny list only
- D. Access Control List only

Correct:C

18.Recovery information has been configured for the Organizational Unit certifier Packaging. The administrator has selected 8 administrators that can process recovery information, but 3 are required to unlock any certified with the Packaging certifier. What three administrators in the list must be utilized?

- A. Any three administrators
- B. The last three administrators
- C. The first three administrators
- D. Any consecutive three administrators

Correct:A

19. Martin has been directed to configure Sametime integration for Domino Web Access (DWA) on the Domino 8 server. Which of the following is required in the server document for Sametime to function correctly inside of DWA?

- A. Java Servlet Manager
- B. HTTP Servlet Manager
- C. Domino Servlet Manager
- D. Sametime Servlet Manager

Correct: C

20. A Configuration Directory utilizes a primary Domino Directory for which of the following?

- A. To negotiate replication settings and obtain the administrative server requests
- B. To obtain information on Person, Group, Mail-In Database, and Resource documents
- C. To obtain information on connection, program, schedule and certificate documents
- D. To allow remote users to passthru to internal Domino servers as defined in the Configuration Directory

Correct: B

21. The Certification log records information related to which of the following?

- A. Certification, recertification and name changes
- B. DOLS certificates, SSL key expirations and Internet Sites
- C. Recertification, self-signed certificates and SSL key expirations
- D. Group membership, self-signed certificates and S/MIME certificates

Correct: A

22. The Rooms and Resource Manager server task is called which of the following?

- A. RnRMgr
- B. RoomMgr
- C. SchedMgr
- D. BusytimeMgr

Correct: A

23. While installing the first Domino server, Alan is presented with a list of Internet services. Which of the following are selections for Alan under Internet services?

- A. Database Replicator, Ports and Web Interfaces
- B. Directory engines, Schedule Management and Billing
- C. Web browsers, Internet Mail clients and Directory services
- D. Protocols, Domino Enterprise Connection Services and Web Statistics

Correct: C

24. Troy, the Domino administrator, needs to update the Lotus Notes Standard 8.x users with a Lotus Notes maintenance release and a new shelf application. Which of the following is needed to perform this update?

- A. Smart Update
- B. Siteupdate.nsf
- C. Site Upgrade and Lotus Links
- D. Smart Upgrade and Siteupdate.nsf

Correct: D

25. A Domino domain is a group of Domino servers that share the same which of the following?

- A.Physical LAN
- B.Domino Directory
- C.Network Protocol
- D.Organization certifier

Correct:B

26.Marshall has noticed that there are large amounts of conversion taking place on messages on the server. He wishes to reduce the amount of MIME to CD conversion. Where would he find the setting to adjust the format used to store a message in the user's mailfile?

- A.The mail server document
- B.The user's Person document
- C.The Global Domain document
- D.The SMTP configuration document

Correct:B

27.Nedra wishes to override all connection documents and scheduling for mail routing and send mail from one server to another immediately. Which of the following is the command she should enter on the server console?

- A.Mail servename
- B.Route servename
- C.Tell Router Show
- D.Tell Router send servename

Correct:B

28.Where does Domino query to determine what addresses are part of the local Internet domain for SMTP mail?

- A.The server document
- B.The Global Domain document
- C.The SMTP connection document
- D.The Foreign SMTP domain document

Correct:B

29.A Notes Named Network (NNN) is a group of servers that meet which of the following requirements?

- A.Servers that have FQDN's that end in the same domain
- B.Servers that are placed in the same group in the Domino Directory
- C.They can connect to each other directly through a common LAN protocol and network pathway
- D.They can reach each other via dial-up connections when they do not run the same protocols

Correct:C

30.Domino uses which of the following to determine the best, least-cost path to deliver mail?

- A.The routing table
- B.The MAPS server task
- C.The SMTP updater task
- D.The certification view in the Domino directory

Correct:A

31.Domino has the ability to route mail in which of the following two default protocols?

- A.MIME and S/MIME
- B.POP3 and IMAP

- C.LDAP and HTTP
- D.NRPC and SMTP

Correct:D

32. Without manually restarting the SMTP server task, how often will it automatically check for changes to Configuration Settings documents?

- A.Never
- B.Two minutes
- C.Hourly
- D.Daily at midnight

Correct:B

33. POP3 and IMAP use which of the following for user authentication?

- A.A Notes id file
- B.Single sign-on (SSO)
- C.Public and private keys
- D.Username and Internet password

Correct:D

34. The purpose of the RnRMgr task is which of the following?

- A.Create an individual document for each mail user in the new RnRBusytime database with busytime marked
- B.Watch for reservation requests in an R&R database and to process them in the order in which they arrive or were created
- C.Scan all the mail users, rooms and resources in the domain and populate the busytime database with the freetime for each one
- D.Obtain a list of all rooms and resources across the local and foreign domains and consolidate the freetime into a single busytime database on a daily basis

Correct:B

35. Rob runs the task UPDALL with the -R argument on his server. What will this accomplish?

- A.It rebuilds indices in all views in all databases on the server.
- B.It discards damaged indices in all views in all databases on the server.
- C.It deletes all indices so that they can be recreated when users access them.
- D.It removes unused space from indices in all views in all databases on the server.

Correct:A

36. While you utilize the Domino Administrator client, what two subtabs may be found under the Messaging tab?

- A.Router and Mailboxes
- B.Mail and Tracking Center
- C.Mail Users and SMTP Configuration
- D.Mail Statistics and Mail Analysis

Correct:B

37. Miranda wishes to deploy LDAP access to the Domino directory. However, she wishes to restrict the fields available to anonymous users. In what document are the fields selected that will be available to anonymous access?

- A.LDAP Site document

- B. Internet Site document
- C. LDAP configuration document
- D. Server configuration document

Correct:D

38. Josh wishes to establish the interval for polling servers from his Domino Administrator client. Where does he configure this interval?

- A. File > Tools > Preferences >
- B. Tools > Administration > Configuration
- C. Administration > Monitoring > Polling Interval
- D. File > Preferences > Administration Preferences

Correct:D

39. LDAP stands for which of the following?

- A. Local Domino Access Parameter
- B. Local Directory Access Protection
- C. Lightweight Domino Access Protocol
- D. Lightweight Directory Access Protocol

Correct:D

40. Your Domino server is not enabled to send crash diagnostics directly to IBM. Which of the following modifications must be made for your server to send the notifications?

- A. Add crash_sendtoibm=1 to the Domino server's notes.ini file
- B. Select the option to send the diagnostics in the server configuration document
- C. In the server document, enable the feature in the Automatic Server Recovery area
- D. Edit the server.diagnostics file on the Domino server to set the send crash data to "true"

Correct:A

41. You are creating event handlers in Domino Domain Monitoring to take action when specific events occur. Which of the following is utilized to limit the frequency of how often an event handler runs?

- A. Hold time
- B. Delay time
- C. Suppression time
- D. Suspension time

Correct:C

42. Jacinta, the Domino administrator, has numerous reports that remain open with no new activity or assigned issues. Which of the following probe types should be implemented to automatically close the older reports?

- A. Event
- B. Monitor
- C. Resolution
- D. Administration

Correct:D

43. The Domino Administrator client may now access which of the following Web administration bookmarks?

- A. Portal, only
- B. Domino, only

- C.Custom company applications, only
- D.All of the above

Correct:D

44.Which of the following allow a single LDAP search to return the entire nested group membership for a user?

- A.dominoAccessGroup
- B.userGroupMembership
- C.directoryUserListing
- D.groupDominoMembership

Correct:A

45.Which of the following are the reference documents for the Probable Cause and Possible Solution statements in Domino Domain Monitoring?

- A.Task
- B.Action
- C.Modular
- D.Corrective

Correct:C

46.Which of the following views in the Domino Directory are required to be updated after the server is upgraded to Domino 8?

- A.\$Users and \$ServerAccess
- B.People, Groups and Servers
- C.People-Hierarchical and Server-Configurations
- D.\$NamesLookup, \$ServerConfig and \$GroupMembers

Correct:A

47.Modular documents for Domino Domain Monitoring are stored in which of the following databases?

- A.ddm.nsf
- B.admin4.nsf
- C.events4.nsf
- D.statrep.nsf

Correct:C

48.Streaming cluster replication uses which of the following to move unread marks and folder additions to clustered servers?

- A.In-memory information
- B.Scheduled replication
- C.A temporary index directory
- D.A database titled clurep.nsf

Correct:A

49.A user in your domain requires a change to his surname and you have generated the proper name change request in admin4.nsf. Which of the following is required to utilize the names list of a database found in Domino 8?

- A.The names list must not exceed 10 Kb
- B.The database must be on the Domino 8 ODS
- C.The database must have a custom view titled "(\$Names)"

D.LocalDomainServers must have designer access to all databases on the server

Correct:B

50.Domino uses which type of document to determine how to connect to another server for replication and mail routing?

- A.Server
- B.Domain
- C.Program
- D.Connection

Correct:D

51.The definition of NSF, the basic building block of Notes, is which of the following?

- A.Notes Sample File
- B.Notes Sync Format
- C.Notes System Function
- D.Notes Storage Facility

Correct:D

52.Restrictions can be configured in Adjacent domain documents and Configuration Settings documents. Domino will default to which?

- A.Adjacent
- B.The most restrictive
- C.Configuration Settings
- D.It will ignore suplicate fields

Correct:B

53.Which of the following statements about the COMPACT server task is TRUE?

- A.The Compact process reindexes views.
- B.By default, compact runs every day at 3pm.
- C.Compact may be scheduled via a program document.
- D.Compact is listed in the TASKS line on all Notes 6 workstations.

Correct:C

54.If there is no entry in the replication history of a database, if access rights have changed, or if the selective replication settings have changed, the Replicator performs what function next?

- A.It has to search all documents in the source database, not just those that have changed since the last replication
- B.It has to search all deleted documents from the destination database, not just those that have changed since the last replication
- C.It has to verify if the connection is from a Notes client or Domino server. If the connection is from a Notes client it will immediately begin a pull and overwrite any server data
- D.It has to open a connection to the Administration Server for the database to inquire if scheduled replication is authorized

Correct:A

55.Teresita Monroe, member of the RBDC group, of the Organizational Unit North from the company Allied is accessing a database. The following entries can be found in the database she is accessing: Anonymous - No Access Default - Reader */Allied - Author Copywrite - Designer Teresita Monroe - Editor What access rights will she have while accessing the

database?

- A.Author
- B.Editor
- C.Designer
- D.No Access

Correct:B

56.As the administrator, you wish to restrict access with Notes id files to all servers in the domain for particular users. Which of the following steps is the best way to accomplish this?

- A.From the Notes client, send an email from the Administrator account with a button that will disable the Notes ID file when clicked
- B.Visit each user workstation, enter the password recovery information for their id file and change their Notes ID password to a new one unknown to them
- C.From the Domino Administrator select the Person documents of users to whom you want to deny access. Choose Actions - Set Password Fields. In the "Check Notes password" field, select Lockout ID
- D.From the Domino Administrator select a Deny Access group for the users you wish to deny access. Choose Administration - Set Lockout. In the "Lockout time" field, select the value zero to permanently lock the users out

Correct:C

57.Which of the following sample passwords would be the most complex in the password quality scale?

- A.kltrbwov
- B.5521nowONu
- C.tobeworking
- D.lakestreampondriverocean

Correct:D

58.Paul, the Domino administrator, mistakenly modified the administration server for the Domino Directory to modify name fields for the Action settings. Which of the following effects could this change have on the Domino environment?

- A.Explicit polices will have to be reapplied to users
- B.Critical names could be removed from the Domino Directory
- C.All users will recertified with the Organization certifier
- D.The Administration ECL will be refreshed for all users and pushed to the workstations

Correct:B

59.OCSP on the Domino server is enabled through which of the following?

- A.Server document
- B.Security policy
- C.Server configuration document
- D.Certificate authority database

Correct:B

60.You have noticed that the server document field "Create databases and templates" is blank. What rights are assigned for this value to users that can access the server?

- A.No users can create databases on the server
- B.All users can create databases on the server

- C.No users may access any template with anonymous access set to None
- D.All users have automatic editor rights to all databases and templates on the server

Correct:B

61.A user is attempting to send an encrypted mail message to another user on the same Domino system. Which of the following is utilized to encrypt the message?

- A.The sender's public key
- B.The sender's private key
- C.The recipient's public key
- D.The recipient's private key

Correct:C

62.Barbara wishes to restrict a group of people to be able to issue informational server commands only. Which field in the server document should she list the group name?

- A.View-only Administrators
- B.System Administrators
- C.Console Administrators
- D.Restricted Administrators

Correct:A

63.Paul has configured a database to Enforce a Consistent Access Control List. When that database is replicated locally, information about the group membership of the person doing the replication is stored at what location?

- A.In the database
- B.In the id file of the user
- C.In the security preferences
- D.In the personal address book

Correct:A

64.While utilizing the Lotus Notes 8 client, you are creating new local replicas of server databases. Which of the following is the default encryption setting?

- A.Simple
- B.Medium
- C.Moderate
- D.Strong

Correct:D

65.Roles are specific to which of the following?

- A.The domain for which they were created
- B.The database for which they were created
- C.The server task to which they are assigned
- D.The server for which they are assigned to run on

Correct:B

66.Access Control List (ACL) entries are checked in a specific order when a user authenticates. Which of the following correctly identifies that order?

- A.Anonymous entry > group entry > server entry > wildcard entry
- B.Server entry > -Default- entry > anonymous entry > group entry
- C.Explicit entry > group entry > wildcard entry > -Default- entry
- D.Wildcard entry > deny access entry > group entry > explicit entry

Correct:C

67.A user is authenticating over the Web to a database using a SSL client certificate. The database Access Control List has her listed as Editor, but the Maximum Internet name-and-password has been set to Reader. What access will she be provided to the database?

- A.Editor
- B.Reader
- C.Author
- D.No Access

Correct:A

68.It was decided to locate the DB2 server on the same physical box as the Lotus Domino server. In this scenario, the DB2 database that stores Domino data is titled which of the following?

- A.Lotus
- B.Domino
- C.NSFDB2
- D.DB2Domino

Correct:B

69.You are about to install the DB2 Access server. Which of the following is required to complete the installation?

- A.A server.id file
- B.A remote DB2 database
- C.A Domino cross certificate
- D.A Lotus Notes client installation

Correct:A

70.When DB2 is the default database storage type, the databases are stored in what location?

- A.In nsf files in the DB2 database
- B.As nsf files on a remote db2 server
- C.As files in the Domino server's disk space
- D.In a DB2 database managed by the DB2 server

Correct:D

71.The Marble Corporation has decided to utilize DB2 as the data storage for their Domino 8 application server. To access the views in the DB2 database, which of the following steps must be performed if each user has different access rights to the data?

- A.Each view of the DB2 data storage must have a unique user name assigned
- B.Each database must have a specific DB2 user name created in the directory
- C.Each person document in the directory must be mapped to a unique DB2 user name
- D.A default DB2 user account must be established and mapped to each user in the directory

Correct:C

72.Which of the following correctly state the order in which steps are performed by the first Domino server installation?

- A.The Domino directory is created; the Reports.nsf database is created; the server.id file is created; the cert.id file is created
- B.The certlog.nsf is created; the Domino directory is created; the log.nsf is created; the mailfile for

the Domino administrator account is created

C.The group LocalDomainServers is created; the server.id is created; the Domino directory is created; the user.id for the Domino administrator is created

D.The log.nsf is created; the organization cert.id is created; the Domino directory is created; the person document for the Domino administrator account is created

Correct:B

73.Your Organizational certifier is named Acme. Each city in your company has an Organizational Unit certifier from the Acme certifier that references the city. Susan wants to create an Organizational Unit certifier below the city Organizational Unit certifier. Which one of the following must she have to accomplish this?

A.Reader access to the domain's directory

B.A copy of the Acme Organizational certifier

C.A copy of the city's Organizational Unit certifier

D.Copies of both the Acme Organizational certifier and the location's Organizational Unit certifier

Correct:C

74.You have made the following entry in the server's notes.ini file Allow_Access_lan7=*\$Groups) Which of the following will this entry provide?

A.Every group in the Domino Directory will be allowed access over lan7

B.Everyone in the Domino Directory that cannot be found in a group can access the server over lan7

C.Every group in the Domino Directory will be denied access to all other ports on the Domino server

D.No one in the Domino Directory will be able to access lan7 unless you first access another port and authenticate as part of a group

Correct:A

75.What is the lowest level of rights in the Domino Directory ACL to allow the creation of groups?

A.Author with the Group Creator Role

B.Editor with the Group Manager role

C.Designer with the Group Maintainer role

D.Reader with the Group Administrator role

Correct:A

76.The server Web1/XYZ defaults to Server document settings to obtain configuration information for Internet protocols when which of the following features is not enabled?

A.Internet Site documents

B.Global Domain documents

C.Single Sign-on documents

D.Web Configuration documents

Correct:A

77.The Certification log records information related to which of the following?

A.Certification, recertification and name changes

B.DOLS certificates, SSL key expirations and Internet Sites

C.Recertification, self-signed certificates and SSL key expirations

D.Group membership, self-signed certificates and S/MIME certificates

Correct:A

78. John is setting up a single domain with a single organization. As a result, all Domino server IDs must be created using which one of the following?

- A. The same cross-certificate
- B. The same administrator certificate
- C. The same country (C) certificate or a child of that country (C) certificate
- D. The same organizational (O) certificate or a child of that organizational (O) certificate

Correct:D

79. An organization has sent you a copy of their update site database for you to import. However, all of the features that are embedded point to their server over HTTP. Your company will not allow the Notes client to access those server. Which of the following describes the best solution?

- A. Rebuild the application to point to an alternate update site
- B. Use the Composite Applications Editor to specify your update site for feature requirements
- C. Extract all of the features and site.xml in the provided site update database and import the features back into your update site
- D. Delete the features from the provided site update database and import your features into the provided database and point users to the remote HTTP server

Correct:B

80. While installing the first Domino server, Alan is presented with a list of Internet services. Which of the following are selections for Alan under Internet services?

- A. Database Replicator, Ports and Web Interfaces
- B. Directory engines, Schedule Management and Billing
- C. Web browsers, Internet Mail clients and Directory services
- D. Protocols, Domino Enterprise Connection Services and Web Statistics

Correct:C

81. Why did Tom designate Server1/Boise/Acme as the Administration Server for the Domino Directory?

- A. To make sure that all new users were registered on Server1/Boise/Acme.
- B. To prevent users from making changes to the Domino Directory on Server1/Boise/Acme.
- C. To force administrators to make all changes to the Domino Directory on Server1/Boise/Acme.
- D. To ensure that the Administration Process would process all Domino Directory changes on Server1/Boise/Acme.

Correct:D

82. When the LDAP service can't find information for which an LDAP client is searching, it can return a referral to the client. What Domino service does it utilize to provide this referral?

- A. MAPS
- B. Referrer
- C. Replicator
- D. Directory Assistance

Correct:D

83. The Domino domain name can be found in which of the following documents?

- A. Server, only

- B.Program, only
- C.Certificate, only
- D.All of the above

Correct:A

84.Recovery information has been configured for the Organizational Unit certifier Packaging. The administrator has selected 8 administrators that can process recovery information, but 3 are required to unlock any certified with the Packaging certifier. What three administrators in the list must be utilized?

- A.Any three administrators
- B.The last three administrators
- C.The first three administrators
- D.Any consecutive three administrators

Correct:A

85.Martin has been directed to configure Sametime integration for Domino Web Access (DWA) on the Domino 8 server. Which of the following is required in the server document for Sametime to function correctly inside of DWA?

- A.Java Servlet Manager
- B.HTTP Servlet Manager
- C.Domino Servlet Manager
- D.Sametime Servlet Manager

Correct:C

86.Which of the following is required to be enabled for Server Fast Restart to function?

- A.Cleanup Script
- B.Fault Recovery
- C.maximum Fault Limits
- D.Server Shutdown Timeout

Correct:B

87.A Configuration Directory utilizes a primary Domino Directory for which of the following?

- A.To negotiate replication settings and obtain the administrative server requests
- B.To obtain information on Person, Group, Mail-In Database, and Resource documents
- C.To obtain information on connection, program, schedule and certificate documents
- D.To allow remote users to passthru to internal Domino servers as defined in the Configuration Directory

Correct:B

88.Tisha has received an encrypted mail message while in Domino Web Access. Which of the following will Tisha be forced to do to view this message?

- A.She will be forced over to HTTPS automatically
- B.She will be forced to log out and log back in over TLS
- C.She will be forced to use her Notes client to read the email
- D.She will be forced to have the message unencrypted by the server and will see the message after it has been processed

Correct:A

89.Jon registered a new user. Which one of the following authentication elements is NOT found in that user's ID file?

- A.Public key
- B.Private key
- C.Certificates
- D.HTTP password

Correct:D

90.Brittany open her composite application in Designer and no provisioning occurred. Which of the following files are read for provisioning information when a composite application is open in the Lotus Notes client?

- A.ca.xml
- B.composite.xml
- C.provisioning.properties
- D.applications.properties

Correct:A

91.The Rooms and Resource Manager server task is called which of the following?

- A.RnRMgr
- B.RoomMgr
- C.SchedMgr
- D.BusytimeMgr

Correct:A

92.During the Domino server installation, Mark is presented with an option asking what type of Domino server he wishes to install. Which of the following installs a Domino server that provides both messaging and application services, with support for Domino clusters?

- A.Domino Utility Server
- B.Domino Messaging Server
- C.Domino Clustered Server
- D.Domino Enterprise Server

Correct:D

93.In what order would Richard build a naming convention for his organization where user names would have the following format: Chris Maxwell/Amsterdam/Acme AJ Mathis/Sydney/Acme

- A.Create a Common Name (CN) Certifier named Acme and then create Organizational (O) Certifiers named Amsterdam and Sydney
- B.Create an Organizational (O) Certifier named Acme and then create Organizational Unit (OU) certifiers named Amsterdam and Sydney
- C.Create a Organizational (O) Certifier named Amsterdam, an Organizational (O) Certifier named Sydney and an Organizational Unit (OU) certifier named Acme
- D.Create two Organizational (O) Certifiers named Acme and use one to create an Organizational Unit (OU) Certifier named Amsterdam and the other O Certifier to create an OU Certifier named Sydney

Correct:B

94.Where does the Domino Server Setup program store the certifier ID file by default?

- A.In the Domino Name and Address Book
- B.In any network drive location that you specify during installation
- C.In the directory you specify as the Domino data directory during installation

D. On the Domino Administrator's local machine in My Documents\Lotus\Certifiers directory

Correct:C

95. Marie, a Domino user, is sending an email to a person not found in the Domino Directory. In what message format will the router send the message?

- A. The format will always be in MIME
- B. The format will always be in SMTP
- C. The format will always be in Notes Rich Text
- D. The format will be decided by the type of address being sent to

Correct:D

96. Each port on a Domino server may be in how many Notes Named Networks?

- A. One
- B. Two
- C. Four
- D. Seven

Correct:A

97. Oscar has noticed that when the Domino server launches, the Router states that it is in the domain acme.com for receiving Internet email. Oscar has yet to create a Global Domain document for his environment. Where is the server obtaining the domain name information?

- A. From the server's host name
- B. From the Ports tab of the server document
- C. From the FQDN field on the server document
- D. From a notes.ini variable SMTPMailDomain=acme.com

Correct:A

98. POP3 and IMAP use which of the following for user authentication?

- A. A Notes id file
- B. Single sign-on (SSO)
- C. Public and private keys
- D. Username and Internet password

Correct:D

99. Domino has the ability to route mail in which of the following two default protocols?

- A. MIME and S/MIME
- B. POP3 and IMAP
- C. LDAP and HTTP
- D. NRPC and SMTP

Correct:D

100. Domino uses which of the following to determine the best, least-cost path to deliver mail?

- A. The routing table
- B. The MAPS server task
- C. The SMTP updater task
- D. The certification view in the Domino directory

Correct:A

101. Which server console command adds or changes a setting in the NOTES.INI file?

- A. Load update
- B. Enter change

- C.Set Configuration
- D.Update notes variable

Correct:C

102.When a recipient's mail file is not on the local server, but is in the Domino domain, Domino calculates how to route the message to the recipient's server and whether to use SMTP or Notes routing (NRPC). What is the next determination of how the message is routed?

- A.If the user's mailfile is running the same Domino version as the sender determines how the message is routed
- B.The configuration of the local server and the message format determine how Domino moves the message to the server
- C.If the local server can send SMTP within the local Internet domain and the home mail server can receive SMTP, the Router uses SMTP to send the message
- D.The configuration of the SMTP task to allow relays on the destination server is read from the Domino Directory. If relays are allowed the message is sent NRPC

Correct:B

103.SMTP stands for which of the following?

- A.Simple Mail Transport Protocol
- B.Simple Mail Transfer Protocol
- C.Standard Mail Transfer Protocol
- D.Standard MailTransport Protocol

Correct:B

104.Miranda wishes to deploy LDAP access to the Domino directory. However, she wishes to restrict the fields available to anonymous users. In what document are the fields selected that will be available to anonymous access?

- A.LDAP Site document
- B.Internet Site document
- C.LDAP configuration document
- D.Server configuration document

Correct:D

105.Which of the following server tasks examines all documents in a database to find and update Readers and Authors fields, by default?

- A.Updall
- B.Catalog
- C.Agent Manager
- D.Administration Process

Correct:D

106.Rob runs the task UPDALL with the -R argument on his server. What will this accomplish?

- A.It rebuilds indices in all views in all databases on the server.
- B.It discards damaged indices in all views in all databases on the server.
- C.It deletes all indices so that they can be recreated when users access them.
- D.It removes unused space from indices in all views in all databases on the server.

Correct:A

107. Where can you view server statistics in the Domino Administrator client?

- A. Server tab > Statistics tab
- B. Statistics tab > Server tab
- C. Domino tab > Server Statistics tab
- D. Server Statistics tab > Domino tab

Correct:A

108. In the Domino Administrator client how do you view a visual representation of the mail system structure?

- A. Topologies tab > Mail and Messaging tab > Map section > Mail view
- B. Server tab > Mail tab > Routing Map section > Server Connections view
- C. Statistics tab > Messaging tab > Mail Routing section > Topology view
- D. Messaging tab > Mail tab > Mail Routing Topology section > By Connections view

Correct:D

109. The purpose of the RnRMgr task is which of the following?

- A. Create an individual document for each mail user in the new RnRBusytime database with busytime marked
- B. Watch for reservation requests in an R&R database and to process them in the order in which they arrive or were created
- C. Scan all the mail users, rooms and resources in the domain and populate the busytime database with the freetime for each one
- D. Obtain a list of all rooms and resources across the local and foreign domains and consolidate the freetime into a single busytime database on a daily basis

Correct:B

110. The Domino Administrator client may now access which of the following Web administration bookmarks?

- A. Portal, only
- B. Domino, only
- C. Custom company applications, only
- D. All of the above

Correct:D

111. Streaming cluster replication uses which of the following to move unread marks and folder additions to clustered servers?

- A. In-memory information
- B. Scheduled replication
- C. A temporary index directory
- D. A database titled clurep.nsf

Correct:A

112. Mandy, the Domino administrator, has created an Adminp request for a named server. However, the request will not post to the target server directly. Which of the following best describes why she is unable to perform this operation?

- A. The target server is in a different Domino domain
- B. She does not have administrator rights on the target named server
- C. The source and destination servers do not have direct connectivity
- D. She is not listed as an editor or higher in the admin4.nsf database

Correct:C

113.Jerrod, a new Domino administrator, has been attempting to take corrective actions on some Domino Domain Monitoring events. The actions are not available. Which of the following rights are required?

- A.Manager rights to DDM.nsf
- B.Execute CA role in DDM.nsf
- C.Editor access to Admin4.nsf
- D.Corective role in Events4.nsf

Correct:B

114.Which of the following views in the Domino Directory are required to be updated after the server is upgraded to Domino 8?

- A.\$Users and \$ServerAccess
- B.People, Groups and Servers
- C.People-Hierarchical and Server-Configurations
- D.\$NamesLookup, \$ServerConfig and \$GroupMembers

Correct:A

115.You built a pre-existing Domino Domain Monitoring environment with customizations to Lotus provided Domino Domain Monitoring documents. Which of the following types of entries are migrated to modular documents in Domino 8?

- A.Stock
- B.Probe
- C.Event
- D.Handler

Correct:A

116.Which of the following allow a single LDAP search to return the entire nested group membership for a user?

- A.dominoAccessGroup
- B.userGroupMembership
- C.directoryUserListing
- D.groupDominoMembership

Correct:A

117.You are building Domino Domain Monitoring probes in Domino 8 and want to create a standard Possible Solution for all of them. Which of the following document types allow this capability?

- A.Modular
- B.Embedded
- C.Component
- D.Corrective

Correct:A

118.The ADC prompting is disabled but the Send to IBM option is enabled. Which of the following prompts will the user receive?

- A.The Notes client end user is prompted to specify whether to send a diagnostic report to their company administrator and to IBM
- B.A diagnostic report is not sent to the company administrator but the Notes client end user is

prompted to specify whether to send a diagnostic report to IBM

C.The Notes client end user sees no messages or prompts enabled with no regarding diagnostic collection and reporting. A diagnostic prompting report is sent to the administrator

D.A dialog box displays information to the end user that a diagnostic report will be sent to their company administrator. The end user is also prompted as to whether they would like to send a diagnostic report to IBM

Correct:D

119.Which of the following Domino database elements are utilized to create documents and display Web pages to a browser?

A.Forms

B.Views

C.Agents

D.Data notes

Correct:A

120.A Foreign domain document defines the path between a Domino domain and which of the following?

A.Adjacent domains

B.Internet domains

C.External applications

D.Organizational domains

Correct:C

121.If there is no entry in the replication history of a database, if access rights have changed, or if the selective replication settings have changed, the Replicator performs what function next?

A.It has to search all documents in the source database, not just those that have changed since the last replication

B.It has to search all deleted documents from the destination database, not just those that have changed since the last replication

C.It has to verify if the connection is from a Notes client or Domino server. If the connection is from a Notes client it will immediately begin a pull and overwrite any server data

D.It has to open a connection to the Administration Server for the database to inquire if scheduled replication is authorized

Correct:A

122.A database designer can assign special access to database design elements and database functions by creating which of the following?

A.Roles

B.Entries

C.Programs

D.Sections

Correct:A

123.A user is attempting to send an encrypted mail message to another user on the same Domino system. Which of the following is utilized to encrypt the message?

A.The sender's public key

B.The sender's private key

- C.The recipient's public key
- D.The recipient's private key

Correct:C

124.To obtain more recent information about the status of a X.509 certificate, you utilize which of the following?

- A.CRL
- B.SSL
- C.OCSP
- D.NDCC

Correct:C

125.Susan has created a list of IP Addresses for the Web server that are allowed access and a list of IP Addresses that are denied access. Both are placed in the appropriate fields. Which field takes precedence BY DEFAULT when the same IP address is found in both lists?

- A.The Allow Access field
- B.The Deny Access field
- C.The Substitution Access field
- D.An error will be presented stating an address may not be in both fields

Correct:A

126.A user is authenticating over the Web to a database using a SSL client certificate. The database Access Control List has her listed as Editor, but the Maximum Internet name-and-password has been set to Reader. What access will she be provided to the database?

- A.Editor
- B.Reader
- C.Author
- D.No Access

Correct:A

127.While utilizing the Lotus Notes 8 client, you are creating new local replicas of server databases. Which of the following is the default encryption setting?

- A.Simple
- B.Medium
- C.Moderate
- D.Strong

Correct:D

128.The password quality scale for ID files has which of the following ranges?

- A.1-18
- B.0-24
- C.1-10
- D.0-16

Correct:D

129.Which of the following fields grants the highest level of agent access on the server?

- A.Run restricted LotusScript/Java agents
- B.Run unrestricted methods and operations
- C.Run restricted Simple and Formula agents

D.Run unrestricted LotusScript/operating commands

Correct:B

130.Paul, the Domino administrator, mistakenly modified the administration server for the Domino Directory to modify name fields for the Action settings. Which of the following effects could this change have on the Domino environment?

- A.Explicit polices will have to be reapplied to users
- B.Critical names could be removed from the Domino Directory
- C.All users will recertified with the Organization certifier
- D.The Administration ECL will be refreshed for all users and pushed to the workstations

Correct:B

131.Paul has configured a database to Enforce a Consistent Access Control List. When that database is replicated locally, information about the group membership of the person doing the replication is stored at what location?

- A.In the database
- B.In the id file of the user
- C.In the security preferences
- D.In the personal address book

Correct:A

132.The TCP Authentication field "Redirect TCP to SSL" is set to "No". What effect does this setting have?

- A.To allow clients and servers to use SSL or TCP/IP to access the Web site
- B.To allow clients and servers to use TCP/IP and POP3 to access the Web site
- C.To require clients and servers to use the SSL protocol to access the Web site
- D.To require clients and servers to utilize LDAP to retrieve authentication information

Correct:A

133.A user accesses a database with the Notes client. The user matches both a wildcard and group entry in the database Access Control List. Which of the following rights is the user granted?

- A.Group
- B.Wildcard
- C.-Default-
- D.Anonymous

Correct:A

134.In which of the following databases may you view all the database ACLs on a server by user name, access level, or by database?

- A.Log
- B.Names
- C.Catalog
- D.Certlog

Correct:C
